

MUHAMMAD FAIZAN

Data Scientist | Machine Learning & AI Enthusiast

Chakwal, Punjab, Pakistan | +92 341 8340381 | mf5768194@gmail.com | github.com/Faizan4356 | linkedin.com/in/muhammad-faizan

PROFESSIONAL SUMMARY

Recent Data Science graduate with hands-on experience building and deploying end-to-end machine learning solutions, including predictive modeling, computer vision, time-series forecasting, and generative AI pipelines. Skilled in Python, XGBoost, deep learning frameworks, and cloud-ready deployment (Streamlit, FastAPI). AWS-certified in Generative AI for Executives, with a strong interest in applying AI to solve real business problems. Seeking an entry-level Data Scientist / Machine Learning Engineer role with an international team.

TECHNICAL SKILLS

Languages: Python, SQL, TypeScript

ML/DL Frameworks: Scikit-learn, XGBoost, TensorFlow/Keras, YOLOv8, EfficientNet, SHAP

Generative AI: Prompt engineering, LLM-based data extraction (Gemini API), AWS Generative AI fundamentals

Data & Deployment: Pandas, NumPy, Streamlit, FastAPI, React, Prophet, Time-Series Forecasting

Tools: Git/GitHub, Jupyter Notebook, Excel/CSV data pipelines, Web Scraping

PROJECTS

Telecom Customer Churn Prediction

- Trained an XGBoost classifier achieving 77% recall and 0.84 AUC, optimized to catch at-risk customers over raw accuracy.
- Added SHAP-based explainability so predictions are interpretable for business stakeholders.
- Deployed the model as a live Streamlit web application.

Retail Sales Forecasting (1,115 Stores)

- Compared Prophet and XGBoost models for time-series sales forecasting on the Rossmann dataset.
- Built a deployed Streamlit app supporting interactive per-store forecasts and CSV upload for custom datasets.

Gender & Image Classification System

- Built a YOLOv8-based male/female detector achieving 95.7% precision and 92.8% mAP50.
- Developed a separate EfficientNetB0 16-class image classifier, both served through a unified Streamlit app.

3D-StyleForge — Virtual Try-On & 3D Avatar Pipeline

- Built a two-stage virtual try-on pipeline: 2D garment try-on (IDM-VTON) followed by image-to-3D avatar conversion (Hi3D/GLB).
- Developed a React frontend backed by two FastAPI microservices to serve the end-to-end pipeline.

Government Job Eligibility Tracker (pk-job-tracker)

- Scraped FPSC/PPSC government job listings and used the Gemini API to extract real eligibility requirements from PDF advertisements.
- Matched extracted requirements against a user profile in a daily-automated Streamlit dashboard.

Excel-to-Dashboard

- Created a client-side tool that converts any uploaded Excel/CSV file into auto-detected HR attrition analytics or a generic BI dashboard.
- Implemented click-to-filter charts and transparent risk scoring using TypeScript.

EDUCATION

Bachelor's Degree — Data Science *Graduated 2026*

University of Management and Technology (UMT), Lahore, Pakistan

CERTIFICATIONS

- AWS Training & Certification — Generative AI for Executives (2026)
- GenAI Powered Data Analytics Job Simulation — Tata (Forage)
- Data Science Job Simulation — BCG X (Forage)
- GenAI Job Simulation — BCG X (Forage)
- Data Analytics Job Simulation — Deloitte (Forage)
